PREFACE TO NEXT SECTION

Commencing on the following page and ending with page 563, there are listed, alphabetically by their respective names under their respective breed headings, all dogs registered individually in the Club's records during 1967. If a dog listed in that section was out of a litter registered in the Club's records since January 1, 1959 its colour or colours is indicated by a code symbol, and the reader may translate the symbol by referring to the code of colour abbreviations appearing on this page and should note the examples of colour coding also set forth on this page.

Where, in the following INDEX OF DOGS REGISTERED INDIVIDUALLY IN 1967, a litter registration number is given for a particular dog, information about that dog's date of birth, name of breeder, name and registration number of sire, and name and registration number of dam, may be found by referring to the listing of that litter (by its litter registration number) under its respective breed in the litter registration section of this volume or in a preceding volume. For example: under Afghan Hounds on the next page there is a dog listed as ABABIL OF ROUARK with an indication that this dog was out of litter #8649-67. For information about that litter, reference should be made to litter #8649 under Afghan Hounds in the litter record section of this volume. Also on the next page there is an Affenpinscher listed under the name URRAY LOLITA with an indication that this dog was out of litter #10777-66. For information about that litter, reference should be made to litter #10777 under Affenpinschers in the litter record section of the volume for 1966.
